What is a 550 watt solar panel?

Renogy's 550 watt solar panels are engineered with high-efficiency PERC (Passivated Emitter and Rear Contact) cells, resulting in higher performance than most conventional panels. These panels have a conversion efficiency of 22.8% and provide more output per surface area. [High-Powered Module] The 550W solar panels are made with these advanced cells.

Can 550 watt solar panels be used for commercial projects?

You can use a set of 550 watt solar panels to build your own commercial PV project of a medium to large scope. While the 550-watt solar panel price tends to be higher than that of lower-wattage options, fewer panels are needed to achieve the same power output. This can offset the higher cost per panel and lead to overall cost savings.
