## Basseterre exports a large proportion of solar modules

How many GW of solar modules did Africa Import in 2024?

Africa imported 1.31 GW of modules from China in December 2024, up 17% MoM from 1.12 GW and up 222% YoY from 0.41 GW. China exported 3.62 GW of modules to the Africa in 4Q24, up 164 % YoY from 1.37 GW. In 2024, cumulative shipments to the Middle East reached 11.36 GW, representing a 43% YoY increase from 7.94 GW.

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

How many GW of modules did China Export in December 2024?

China exported 16.63 GW of modules in December 2024, up 9% MoM from 15.2 GW and up 3% YoY from 16.18 GW, according to InfoLink's customs data. China exported 235.93 GW of modules from January to December 2024, up 13% YoY from 207.99 GW.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93 GW of PV modules, an increase of 13% compared to 207.99 GW in the same period in 2023. Comparison of Chinese PV module exports in 2023 and 2024. Source InfoLink

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

Conclusion: Basseterre's PV module exports offer cost-effective, high-efficiency solutions for global solar projects. With growing R& D investment and streamlined logistics, it's positioned to ...

China's exports of solar modules are expected to gain further momentum this year, buoyed by increasing global demand amid green energy transition as well as Europe's plan to ...

MIIT says China produced 20% more polysilicon, wafers, cells and modules in 10M 2024 This includes 510 GW of solar cells of which ...

In 2024, the export value of solar photovoltaic modules worldwide stood at approximately \*\*\*\* billion U.S.

This indicates that the development of China's solar PV module industry directly influences the global situation. Additionally, around 41 % of China's solar module production is ...

Module exports increased by more than 30% year-on-year, indicating strong overseas

---

demand. According to Gaixi Consulting, the cumulative export of modules in ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

Estimates by Pingan Securities show that China will account for a large proportion of solar product exports during the 2022-26 period. It is expected to account for less than half of the major ...

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

The policies enacted by the Chinese government to accelerate construction of large-scale solar PV plants in deserted areas is considered a key factor contributing to the ...

The export volumes of wafers, cells, and PV modules reached 70.3GW, 39.3GW, and 211.7GW, respectively, with year-on-year growth rates of 93.6%, 65.5%, and 37.9%. This ...
