Solar and wind power are an increasingly important part of the country's energy mix © AFP/Getty Images This article is an on-site version of our Energy Source newsletter. Premium subscribers can sign up here to get the newsletter delivered every Tuesday and Thursday.

Why is Brazil's green energy build-out a problem?

Following a wind and solar power boom over the past decade, Brazil's green energy build-out has hit an obstacle as the network of cables that transport electricity fails to keep pace.

How important is wind & solar in Brazil?

But wind and solar are an increasingly important part of the mix, having rocketed from just 4 per cent (or 8 gigawatts) of Brazil's total generation capacity in 2015 to two-fifths (or 99GW) this year, according to data from consultancy Aurora Energy Research. It calculates that \$78bn was invested over that period.

What happened to wind and solar generators in Brazil?

Between January and October, wind and solar generators in Brazil had their production reduced by 20.4 per cent, according to consultancy Volt Robotics. That was more than three times higher than the same period last year. Financial losses resulting from these enforced power wastages have exceeded R\$6bn (\$1.1bn) since 2024, according to Aurora.

Self-production of clean energy reduces blackouts and costs for Brazilian consumers Brazil takes a big step towards sustainability with the introduction of solar energy ...

The Brazilian electricity sector is experiencing a paradox: while the need for flexibility in the grid is growing - pressured by the ...

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage ...

The Brazilian electricity sector is experiencing a paradox: while the need for flexibility in the grid is growing - pressured by the expansion of renewables such as solar and ...

Explore Brazil's 19.2GW solar growth in 2025 and why battery storage is crucial for businesses. Learn about DG opportunities, new regulations, and how DLCPO's lithium ...

1. Introduction The advancement of solar energy in Brasil has been remarkable over the past decade, driven by decreasing photovoltaic ...

Why Brasilia Needs Advanced Energy Storage As Brazil's capital grapples with rising electricity demand and intermittent renewable energy supply, innovative storage solutions have become ...

Following a wind and solar power boom over the past decade, Brazil's green energy build-out has hit an obstacle as the network of cables that transport electricity fails to keep pace.

Furthermore, the sharp drop in battery storage costs is opening new possibilities for pairing solar with storage, addressing intermittency and making clean energy available 24/7. In ...

The Perfect Storm: Sun, Water, and Smart Tech Take the Ilha Solteira Hydro-Solar Hub, where JA Solar's 900+ high-efficiency panels work alongside hydropower. This \$15M ...

1. Introduction The advancement of solar energy in Brasil has been remarkable over the past decade, driven by decreasing photovoltaic technology costs, incentives for ...

The agreement aims to promote battery energy storage systems (BESS) for the commercial, industrial and agricultural sectors in Brazil, and both companies are optimistic ...
