What is a sinewave inverter?

A sinewave inverter is a device that converts DC power (such as from batteries or accumulators) into alternating current (typically 220 volts 50 Hz sine or corrected). In simpler terms, it converts direct current into alternating current. Our common emergency power supply often uses a DC battery to produce 220V AC through the use of a sinewave inverter.

What is pure sine wave inverter?

Pure Sine Wave Inverter is one of the most recognizable technologies that has been utilized by both industrial and private sectors in Distributed Power Generation (DG) Systems. DG Systems are normally assisted by Photovoltaic (PV) systems and fuel cells on small scale.
