
How many substations does Kyiv power base station have

How many power plants are in Ukraine?

Ukraine has 64 utility-scale power plants in operation, with a total capacity of 48569.8 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth

How many people are left without electricity in Ukraine?

Another power supplier, Yasno, says Ukrainians are likely to face power cuts until March. Already, some six million people have been left without electricity, according to Ukraine President Volodymyr Zelensky. To clarify, this means millions are without adequate heating, just as temperatures fall below zero in many parts of Ukraine.

Is Russia destroying Ukraine's energy infrastructure?

Russia has stepped up its bombardment of Ukraine's energy infrastructure. Here is a detailed and interactive map of the country's power stations. Ukraine's power supplies are being targeted by the Russian army, leaving much of the country with no heating throughout a cold winter. (Photo by Ed Ram/Getty Images)

Why is Russia destroying Ukraine's power plants?

Russia's widespread and intentional destruction of Ukraine's electricity installations means that the national power company, Ukrenergo, cannot meet 50% of demand as things stand. Another power supplier, Yasno, says Ukrainians are likely to face power cuts until March.
