## Is Brunei's all-black components suitable for the field

Does Brunei Darussalam have oil & gas resources?

Supply Brunei Darussalam continues to strengthen upstream oil and gas activities to ensure long-term energy security and sustainability of oil and gas reserves. The country is considering the development of unexplored areas such as deepwater fields.

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-off potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

Which chapter should be cited in Brunei Darussalam country report 2023?

This chapter should be cited as: Ministry of Energy, Brunei Darussalam (2023), "Brunei Darussalam Country Report", in Kimura, S., H. Phoumin, and A.J. Purwanto (eds.), Energy Outlook and Energy-Saving Potential in East Asia 2023. Jakarta: ERIA, pp.73-99 1.

Background

What is the future of energy supply in Brunei Darussalam?

Natural gas will remain the dominant source of energy supply, accounting for about 73%. This is followed by oil at 20%, and coal at 7%. Coal is expected to provide energy for the new large petrochemical complex in Pulau Muara Besar (Figure 2.1). Brunei Darussalam will continue to become a net energy exporter in the future (ERIA, 2019).
