
Non-standard uninterruptible power supply quotation

Why are uninterruptible power supplies important?

In times of increasing relevance of decentral power supplies and decreasing reliability of the power supply networks, uninterruptible power supplies (UPS) become more and more important.

What if the AC input power supply is below allowable limits?

Alarm and trip functions shall be provided in accordance with Table 6 as a minimum. In case the AC input power supply falls below allowable limits, the rectifier shall shut down. b When the AC input power supply resumes and remains within allowable limits, the rectifier shall start automatically and no reset is required.

Which transformer is required to provide neutral terminal to UPS system?

5.1.16 (Optional) Isolation transformer is required for providing neutral terminal to the UPS system. Detailed configuration of the isolation transformer shall be referred to the Particular Specification. Bypass mode. Under normal operation, the rectifier/charger unit shall convert the incoming a.c. mains power supply to d.c. power.

What is a UPS system without redundancy?

A UPS system without redundancy is a typical solution for loads which are not safety relevant in case of black out. This is the easiest solution for a UPS system. In case of a failure of the charger, the battery or any other device which is necessary for the function of the UPS, the load cannot be powered if the mains fails at the same time.
