## Ottawa Power Station Generator

Why is Ottawa Hydro generating station No 2 a classified federal heritage building?

The Ottawa Hydro Generating Station No. 2 is a Classified Federal Heritage Building because of its historical associations, and its architectural and environmental values. The Ottawa Hydro Generating Station No. 2 is associated with several significant aspects of the evolution of hydro electric power in Canada.

When was Ottawa Hydro generating station 2 built?

Ottawa Hydro Generating Station No. 2 underwent a major structural and mechanical refitting in 1908-1909, and contains some of the oldest operational hydro-electric equipment in Canada.

Where is Canada's oldest hydroelectric generating station?

Canada's oldest hydroelectric generating station that's still in operation today was commissioned right here in the nation's capital in 1891. Generating Station No. 2 is located on Victoria Island in the heart of downtown Ottawa; a stone's-throw away from Parliament.

Does energy Ottawa have a generating station at Chaudière Falls?

In 2007, Energy Ottawa added a third generating station at Chaudière Falls. A recycled turbine and generator were salvaged from an old hydro station in west Quebec and have been added to increase generating capacity. Natural Resources Canada provided assistance with computerized high efficiency turbine design.
