## Price of secondary transportation of solar modules

How much does a solar module cost?

All Black and Bifacial modules were \$0.261/Wp and \$0.308/Wp respectively. The PV Module Price Index is a resource for solar professionals to accurately track modules traded within the secondary market. This year's report comes with some key changes to portray more precisely what's happening in the market.

How much does a PV module cost in 2022?

Fig. 2 illustrates the price and harmonized environmental footprint development of PV modules from 1957 to 2022, with the price dropping significantly from almost US\$3500 per watt to around US\$0.25-0.3 per watt by the end of 2022 (OWID, 2023; Nagy et al., 2013; Nemet, 2019).

What is the PV module price index - secondary solar market report?

The third annual (2023) PV Module Price Index - Secondary Solar Market report is now available for download. The PV module price index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

Is the secondary solar market gaining momentum?

Over the three-year period, solar panels listed for resale on the exchange increased by 29 percent, an indicator that the secondary market is gaining momentum. "For the third year in a row, the PV Module Price Index has provided data that points to a growing secondary solar market," says Renee Kuehl, COO at EnergyBin.

The PV Module Price Index is a resource for solar professionals to accurately track modules traded within the secondary market. This year's report comes with some key changes ...

The cumulative global photovoltaic (PV) waste reached 250,000 metric tonnes by the end of 2016 and is expected to increase ...

We then highlight their characteristic parameters, performance and key differences, as well as open challenges to PV recycling in terms of cost-effectiveness, policy regulations ...

This study investigates the cost structure associated with transporting photovoltaic (PV) modules, comparing scenarios of ...

The 3.0 percent increase, measured by the household living-costs price indexes (HLPs), follows a 3.8 percent increase in the 12 months to the September 2024 quarter. The most recent high ...

The system boundary of LCA includes various recycling activities, ranging from collecting PV module wastes to recovering secondary materials and energy; the boundary ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell

---

price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

This marks the first increase in FOB China module prices, following upstream price gains that began in the first week of July amid government intervention.

Furthermore, we examine the cost savings, energy savings, and GHG emissions reductions achieved through a globalized solar PV module supply chain compared to ...

An increase of 1%abs leads to a transport cost reduction of 4.2%rel. Sensitivity analyses demonstrate that transport costs can account for up to 43% of the final module price in ...

This marks the first increase in FOB China module prices, following upstream price gains that began in the first week of July amid ...

Its price fall made a significant contribution to the slower increase in the annual inflation rate in December 2024," Growden said. Between the December 2023 and December 2024 quarters,

...
