## Price of solar panels 100 square meters in Ukraine

How much do solar panels cost?

You pay about \$10,900. If you choose to have half of this energy generated by solar panels, it'll cost \$6550. All the energy for a large family: a family that consists of 5 or 6 people and wants to generate all the energy with solar panels easily pays \$12,800, as you need 26 solar panels to achieve this.

How many kWh can a solar panel generate a year?

This reflects the power of the solar panels. With 1Wp you can generate 0.85 kWh annually in a moderate climate. The following table shows the prices per solar panel, per Wp and per kWh, the number of square meters that these panels occupy, and including installation, materials. A few solar panels: the cheapest option is to buy a few solar panels.

How many solar panels do I Need?

To compare, a household of one or two people needs between 11 and 16 panels. If you buy 6 panels for an average price of \$3450, you can generate almost half of the energy for this household. An average household: if your family consists of 3 to 4 people, you will need between 20 and 24 panels to generate all the energy you use each year.
