
Price of solar panels in Ere Township

How much does solar cost in Pennsylvania?

That price drops to \$12,275 after using the full federal solar investment tax credit (ITC). The size of your solar panel system is a big factor in your total cost. The average Pennsylvania household needs a 10.17 kW system to offset enough energy costs to make solar viable.

Are solar panels worth it in Pennsylvania?

We've talked to dozens of solar panel customers in Pennsylvania, and most seem happy with their decision to go solar. For many, the long-term savings on energy bills make solar panels worth it. On average, Pennsylvania homeowners with solar panels avoid \$58,076 in utility costs over 25 years.

Are solar panels tax deductible in Pennsylvania?

The federal solar investment tax credit is usually the most significant financial incentive when buying solar panels. It is not a rebate or a refund but goes toward what you owe on federal income taxes. In Pennsylvania, you can lease a system or enter a power purchase agreement with low upfront costs.

Where can I get a solar permit in Pennsylvania?

Pennsylvania also has grant and loan programs through the Department of Community and Economic Development that support solar adoption. If you live in Philadelphia, you can get a permit fee break through the solar incentive program. [EXPLORE: Pennsylvania solar incentives](#)
