
Tax increase on solar inverters

How will the new tariffs affect the solar industry?

The new tariffs are anticipated to: Increase equipment costs: Solar panels, inverters, and batteries will become more expensive due to higher import duties. Tighten supply chains: Manufacturers may struggle to meet demand, leading to potential shortages. Delay projects: Extended lead times for equipment could postpone installation schedules.

What tariffs will be imposed on solar panels in 2025?

Starting January 1, 2025, solar wafers and polysilicon imports will face a 50% tariff rate, while tungsten products, including bars and sheets, will incur a 25% tariff. These materials are essential for solar energy development and various industrial applications.

Will tariffs affect REC Solar panels and Enphase microinverters in 2025?

While these tariff increases are expected to drive up costs for some products in 2025, the equipment we use--such as REC solar panels and Enphase microinverters--is not directly impacted by these rulings. This means any price increase for our customers should be lessened.

Will new 301 Solar Tariffs increase solar prices?

New 301 solar tariffs and trade investigations are likely to increase prices in the solar industry, especially on certain solar brands.

The Rajasthan Electricity Regulatory Commission (RERC) has ruled that the increase in rates of basic customs duty (BCD) on import of solar inverters along with ...
