
Tj2000a pure sine wave inverter

What is a pure sine wave inverter?

Our pure sine wave inverters provide high-quality, stable, and clean power for sensitive electronic devices. They are designed to convert DC power from batteries or solar panels into AC power for home or industrial use. Our solar inverters are designed to provide stable and clean power for homes, businesses, and industrial applications.

What is the difference between a pure sine wave inverter and a modified?

The difference between the two is how closely the output replicates mains power. Logically it follows that the process used in a pure sine wave inverter is more complex than a modified sine wave inverter and subsequently more expensive.

What happens if I accidentally connect a ip2000 inverter?

If you accidentally connect the inverter to the battery incorrectly (reverse polarity) a large current will be drawn by the inverter which will blow the protection fuse.
