# Tokyo Solar PV Panel Subsidy

Will Tokyo subsidize solar panels?

In March last year, the Tokyo Metropolitan Government established a 150 billion yen fund to subsidize the installation of solar power generation equipment for Tokyo residents. Subsidies will be provided if solar panels are installed during the construction of new eco-friendly houses or while retrofitting existing houses with insulation.

When will solar panels be required in Tokyo?

Starting April 2025, Tokyo will implement a new regulation requiring solar panels on newly constructed homes. What Is the Mandatory Solar Panel Installation? Starting in April 2025, Tokyo will require installing solar panels on all new residential buildings.

What are Japan's solar energy subsidies?

The Japanese government has created the following subsidies for residents that are shifting toward solar power systems: This subsidy is for young couples or families with young children who want energy-efficient homes; the fund will contribute up to 600,000 yen for renovations and 64,000 yen for storage batteries.

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt(kW). Are there subsidies for installing solar panels in Japan?
